# TOPCLASS
LMS by WBT Systems

Validate and recognize your learners' experience, competency, knowledge, and skills
with learning pathways and certifications in TopClass LMS

Create learning pathways based on skills and competencies needed for specialization, specific job roles, or skills mastery to motivate learners to progress toward their professional development goals.

TopClass LMS allows you to track progress and award certificates or digital badges at every step to support and encourage learners. Stack credential pathways to create a hierarchy of achievements from a course, to a certificate, certification, or full designation program.

Train and Recognize the Future Leaders of your Industry

A supportive and collaborative learning community helps students acquire and retain knowledge, instilling a sense of belonging and camaraderie which keeps students engaged and motivates them to persevere toward achieving their professional development goals. TopClass LMS provides tools to enable students to share their achievements and make the process of recertifying and maintaining their credentials easier.

Reward learners with Micro-credentials

Strengthen your learning community by making members' continuing education achievements more visible to their network and employers.

Recognize completion of programs, courses, a learning path, or a certification track with micro-credentials and digital badges.

Add value to your programs by helping learners to publicize their achievements to integrated badging platforms, Badgr or Credly.

CREDENTIALING PROGRAMS:
CERTIFICATES
CERTIFICATIONS
DESIGNATIONS

TopClass LMS simplifies management of every aspect of the complete certification life cycle
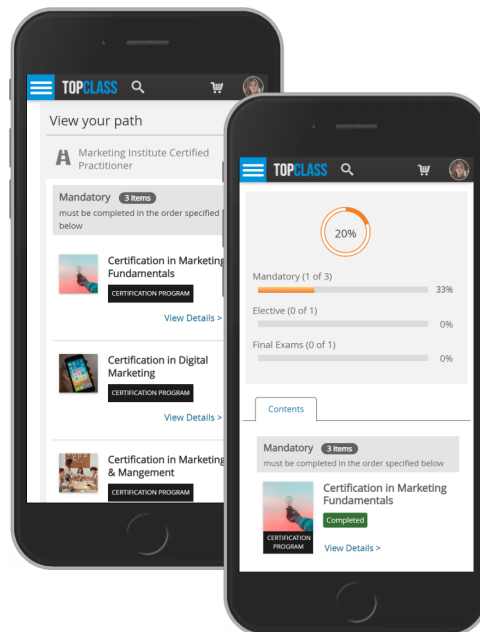

Certification paths can include a mix of mandatory and elective courses, required professional experience, examinations, and external training. TopClass LMS helps you define and manage your certification programs and their associated maintenance of credit (MOC) requirements—from receiving initial applications and tracking requirements to delivering assessments and exams.

A rules-based notification wizard delivers automatic email notifications to certification candidates about their pending competency and re-certification requirements. Students can automatically receive and print their own certificates.

Track and Manage Continuing Education Credits

Whether you need to award CE, CPE, CME, or CLE credits according to national or state requirements, TopClass LMS simplifies management of complex rules for professional continuing education credits.

Create and grant multiple continuing education unit (CEU) values and CEU types per curriculum record based on your organizational needs.

Enable Learners to Manage their Professional Development

Provide learners a one-stop access point to track their own CEs or CMEs against their transcript or a specific MOC requirement.

Learners can import external credits into TopClass for a complete educational record.

This end-to-end self-service approach to certification allows them to track and manage their re-certification through the years.
