TopClass learning management system is designed with ease of use in mind for all types of users.

Robust, two-way integrations are available for a variety of business-critical systems.

If you don't see your system listed above - ask us what systems we integrate with.

### Deliver a Seamless, Engaging, Personalized Experience

Single-sign-on and highly-customizable layouts and branding ensure that when learners log in to your website, they are automatically signed into TopClass LMS and enjoy a professional, consistently branded experience across your integrated systems.

### Increase Revenue, Streamline Processes

Boost eLearning revenue by reaching, connecting with, and converting education customers in more effective ways. Eliminate rekeying of data, which saves time, reduces errors, and provides better quality management. The integration simplifies the complexities around tracking, notifications, and reporting, and supports configurable work flows to align TopClass LMS with your internal processes and information needs.

### Real-time, Accurate Information and Reports

Due to the automatic two-way information exchange, the bridge makes ongoing administration a lot more efficient and less prone to errors because it eliminates re-keying of data such as learner profiles, completed training courses or CE credits earned. The robust, configurable integration ensures TopClass users that the right information is available in the right system at the right time.

*"TopClass LMS simplifies the administration of our courses and member training records, especially with the integration with our member database. We now have more time to focus on developing innovative content to extend our accreditation and professional development programs."*

- Adrienne Glancy Industry Training & Accreditation , Gymnastics Australia

### Additional options to upgrade your learning solution

#### Data Migration

Let us transition your existing content and data into TopClass LMS. Our content and data migration services will save you time and effort, ensuring a smooth transition.

#### Customization

Our standard integration bridges transfer the most commonly required data. If you need customizations, we will adapt TopClass to run exactly as you need it.

#### Advanced Reporting

Get more from your data with a custom reporting package or take advanced data model training to help you build your own reports.

TopClass LMS is an award winning, comprehensive and flexible learning management system.

TopClass enables delivery of all types of training, whether online or classroom-based, blended, workshops or conferences.

Bring your education and certification programs to the next level:

- Easy to use tools for content management and creation. Support for Tin Can API, SCORM, AICC.
- Social learning facilitates sharing and collaborative learning. Motivate and reward learning with digital badges.
- Fully customized branding and a clean, modern design simplify navigation and administration.
- Comprehensive tools for managing your Continuing Education & Certification programs easily support managing multiple credit types and requirements.
- Global eCommerce with support for multiple currencies, discounts, and payment options.
